Aging and Disease Special Issue:

Extracellular Vesicles in Health and Disease

Call for Review and Original Research Articles!

Deadline for submission of articles: **January 15, 2021**

Both reviews and original research articles focused on the behavior and function of EVs in healthy and disease conditions, including their role in disseminating diseases or the progression of diseases will be considered. Besides, articles focused on the promise of stem cell-derived EVs for treating various disorders/diseases are of interest.

Aging & Disease *(aginganddisease.org) is a peer-reviewed, open-access online journal that publishes novel and high-impact findings on central issues about the biology of aging, the pathophysiology of diseases, and innovative therapies for diseases afflicting adults and the elderly population. The journal is indexed in PubMed, Thomson Reuters, CrossRef, Google Scholar, and Scopus.*

The 2019 (Clarivate Analytics) Impact Factor of Aging & Disease is 5.4
(5-year impact factor is 5.5)
