

## Results of IOS and MBX Cessation Consultation

Pursuant to the consultation announced on 02 September 2020, IHS Markit Benchmark Administration Limited (IMBA) will implement a modified set of criteria to cease certain IOS and MBX indices. The feedback received from participants was widely supportive of our proposal. Both the buy side and sell side also included suggestions to either cease fewer or more indices. Based on the feedback received, we've made adjustments to accommodate as many concerns raised by market participants as possible.

### Final Criteria

The final criteria used to determine the status of each index is as follows:

1. Cessation of all IOS and MBX indices which have less than ten open contracts and hence, do not appear in the DTCC Section I Table 7 report.
2. Cessation of all IOS and MBX indices which do not meet one of the following two thresholds:
  - a. Greater than \$20mm current net notional outstanding
  - b. Greater than 75 open contracts

### Final Results

As of the conclusion of the consultation period, the most recently available DTCC Section I Table 7 report published on 29 August 2020. To determine the status of an index, criteria 1 and 2 were applied to the open interest figures available in this report.

**Note** - The application of criteria 1 and 2 resulted in the cessation of all Ginnie Mae indices. Through the feedback received, IMBA has determined it is appropriate to continue to have this agency represented by at least one index. Given current levels, IOS.GII30.500.10 (RED ID 4A845PAA5) will remain active regardless of its failure to meet the necessary criteria.

For the following IOS and MBX indices labeled CEASE, IHS Markit will publish a final Period End Price on 09 October 2020, and the official Index Cancellation Date will be 12 October 2020:

Index	RED ID	Current Net Notional	Open Contracts	Status
<b>MBX.GII30.450.10</b>	5A79FLAA2	N/A	<10	<b>CEASE</b>
