Methodology

On behalf of Univision Communications Inc., Latino Decisions conducted a statewide poll of Texas registered voters with an oversample of Texas Latinos. The poll was overseen by Univision polling director Dr. Sergio Garcia-Rios. Overall 1,004 Texas registered voters, including 504 Latinos, were interviewed from combination of landline, cell phone, and online completion modes. All voters were randomly selected and given the opportunity to complete the interview in English or Spanish, at their discretion. Randomized stratified sampling was employed to ensure the appropriate balance of Latinos across state, gender, age, education, and nativity. Post-stratification weights were applied to bring the sample into alignment with the Census CPS estimates of registered voters in Texas. Overall 9% of interviews were in Spanish and 91% in English; 24% Spanish and 76% English among the Latino sample. The final Texas statewide survey contains an overall design error of +/- 3.1%. For the Latino sample the possible error is 4.4%. The survey was in the field February 21-26, 2020.
