Introduction

COVID-19 Biweekly Outbreak Report data will be finalized every other Sunday at 11 p.m. PDT, and the report will be published every other Wednesday. Data for this week are up to date as of Sunday, May 15. Please note that the data reported here are continually being updated. For daily up-to-date information, visit the OHA COVID-19 web page: <https://govstatus.egov.com/OR-OHA-COVID-19>. These data represent a snapshot of COVID-19 outbreaks. The data shown in this report come from Oregon's electronic disease surveillance system for reportable diseases.

Care Facility, Senior Living Communities and Congregate Living Settings Report

OHA is publishing data on cases and deaths in care facilities, senior living communities, and congregate living settings that have three or more confirmed COVID-19 cases or

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

one or more deaths (Table 1). Facilities with outbreaks that are considered resolved are moved to the closed outbreak list (Table 2). An outbreak is considered resolved if no new cases are identified for 28 days after the last case onset. This list does not include correctional facilities.

In addition to the facilities listed, OHA is aware of 488 congregate settings of five or fewer beds that have had three or more confirmed COVID-19 cases or one or more deaths. Because foster homes typically have relatively few residents, OHA follows the Oregon Department of Human Services practice in not naming these locations to protect patient privacy.

To date, there have been three deaths of staff who worked in a congregate care setting with COVID-19. To protect patient privacy, OHA does not report employee deaths by workplace or other potentially identifying information. Similar information will be released in the future in biweekly reports only if OHA determines that such information, in addition to other information it releases, and information released by other agencies, like the Centers for Medicaid and Medicare Services, cannot be used to identify an individual. To date, there have been 34,493 cases and 2,323 deaths associated with congregate care settings.

Table 1. Active outbreaks

Active outbreaks in care facilities, senior living communities and congregate living settings with three or more confirmed COVID-19 cases or one or more COVID-19 related deaths (n=104)

*Case and death counts include all cases and deaths associated with the outbreak (e.g., staff, residents, close contacts).

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Workplace Outbreak Report

OHA is publishing data on cases in workplace outbreaks. Given a cluster of cases in space and time, within plausible incubation periods for the pathogen, OHA epidemiologists will consider cases to be related—i.e., part of a workplace outbreak—unless a more likely alternative source for acquisition is identified. Any suspected workplace outbreak is required to be reported to the local public health authority (see OAR 333-018-015). Local health department and tribal partners investigate to identify workplace outbreaks. This list of outbreaks will be updated as investigations continue, and we learn about epidemiologic links between cases. This list may not reflect all the workplace outbreaks in Oregon. In January 2022, OHA's guidance for local public health was revised to direct response efforts to outbreaks in settings of high consequence. This shift in priorities is reflected in the facilities reported below.

To protect privacy, OHA is only reporting workplace outbreaks with five or more cases and only for workplaces with at least 30 workers. If more than 50% of the workers are COVID-19 cases, specific case numbers will not be reported. Case counts include all persons linked to the outbreak, which may include household members and other close contacts. The list below includes active workplace outbreaks (Table 3), meaning that there has been a case within the past 28 days. Outbreaks that are resolved are moved to a separate table of resolved outbreaks (Table 4). Outbreaks are removed from the closed outbreak list after 56 days.

The presence of correctional facilities and food packing and agricultural worksites on this list highlights the challenges of controlling COVID-19 in settings where people must work or live in proximity. People of color are overrepresented in agricultural and correctional settings, contributing to the higher rates of COVID-19 observed in these groups. OHA publishes these data in response to public request, but with some concern that workers or staff members at these workplaces might be subject to discrimination.

State and local public health officials work intensively with staff at workplaces where outbreaks are identified to isolate sick workers, test and quarantine those who have been exposed and implement workplace changes to reduce risk of transmission. Unless otherwise noted, public health officials have determined that these workplaces, their workers and their products do not pose significant risk to the public. Workers of a business with a workplace outbreak should never be subjected to discrimination or excluded from patronizing other businesses. In fact, discriminating against workers or avoiding products might jeopardize the economic viability of essential local businesses.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

Employers can support their workers with policies that ensure that ill workers are not in the workplace and are not penalized for taking sick leave. Employers should ensure that workers are aware of and understand these policies.

There have been 179 deaths and 36,980 cases associated with all workplace outbreaks that have been reported to date. To protect patient privacy, OHA does not report employee deaths by workplace. Cases that are associated with more than one workplace outbreak will be reported in the case count for all relevant workplace outbreaks.

Child Care Outbreak Report

OHA is publishing data on cases in child care settings. Given a cluster of cases in space and time, within plausible incubation periods for the pathogen, OHA epidemiologists will consider cases to be related—i.e., part of a child care outbreak—unless a more likely alternative source for acquisition is identified. Any suspected child care outbreak is required to be reported to the local public health authority (see OAR 333-018-015). Local health department and tribal partners investigate to identify outbreaks in these settings. This list of outbreaks will be updated as investigations continue, and as we learn about epidemiologic links between cases. This list may not reflect all of the outbreaks in child care settings in Oregon.

As of September 23, 2020, OHA will report child care outbreaks with 2 or more cases in child care settings with the capacity for more than 16 students. Previously, OHA reported child care outbreaks with five or more cases and in settings with at least 30 students. Case counts include all persons linked to the outbreak, which may include household members or other close contacts. The list below includes active child care outbreaks (Table 5), meaning that there has been a case within the past 28 days. Outbreaks that are resolved will be moved to a separate table (Table 6) of resolved outbreaks. Outbreaks will be removed from the list of resolved outbreaks after 56 days. In addition to the 41 outbreaks listed below, there are 7 outbreaks in a day care center that has a capacity of 16 or fewer children.

Kindergarten-12th Grade School Report

OHA is publishing data on COVID-19 cases associated with schools that offer in-person instruction. This is to inform the public of potential COVID-19 exposure and to provide transparency surrounding COVID-19 in schools. School is defined as any place of learning for students from kindergarten through twelfth grade, or a subset, with at least 30 students enrolled. This includes, but is not limited to, public schools, private schools, parochial and charter schools. Staff is defined as any person who works full time or part-time at the school, regardless of their position. A volunteer is defined as any person who volunteers onsite. Cases are reported if they worked or attended school (either for class or other activities like a sports practice) during their exposure or infectious period.

COVID-19 Biweekly Report

Oregon's Biweekly Surveillance Summary

As of July 21, 2021, OHA will provide three tables with school associated case and outbreak information. OHA will now report recent student and staff/volunteer cases in addition to schools with active and resolved outbreaks. OHA will no longer report student and staff/volunteer cases as cumulative case counts. A school may appear in more than one table as the case and outbreak tables record different information.

The July 14, 2021, Weekly Outbreak Report has a list of cumulative case counts by school of the 2020-2021 school year and can be found here:

<https://www.oregon.gov/oha/covid19/Documents/DataReports/Weekly-Outbreak-COVID-19-Report.pdf>.

Table 7 below includes all schools that have recent cases, defined as 1 or more cases of COVID-19 in students or staff/volunteers where the most recent onset occurred within the past 28 days. Student and staff/volunteer cases with onset beyond the past 28 days will be removed from the student and staff/volunteer case counts in Table 7. Schools where all cases of COVID-19 have resolved, defined as no new cases in 28 days after the last case's onset, will be removed from the Kindergarten-12th Grade School Report. Previous versions of the report can be found in the archive.

As of September 22, 2021, all cases associated with school outbreaks will be reported in the active (Table 8) and resolved (Table 9) tables. Case counts may include cases who were not at school but are close contacts of those exposed at school. This provides a more accurate picture of the scale of K-12 related outbreaks because they may link to other cases in the community.

Table 8 includes all schools with active outbreaks, defined as 2 or more cases of COVID-19 in students or staff/volunteers that have a shared, defined exposure within a school setting and where the most recent onset occurred within the past 28 days. Schools that have resolved outbreaks, defined as 2 or more cases of COVID-19 in students or staff/volunteers that have a shared, defined exposure within a school setting and where the most recent onset occurred between 28-56 days ago, will be moved to a separate table (Table 9). Schools that have closed outbreaks, defined as 2 or more cases of COVID-19 in students or staff/volunteers that have a shared, defined exposure within a school setting and where the most recent onset occurred more than 56 days ago, will not be included in the Kindergarten-12th Grade School Report. Any suspected school outbreak is required to be reported to the local public health authority (see OAR 333-018-015). Local health department and tribal partners investigate to identify outbreaks in these settings. This list of outbreaks will be updated as investigations continue, and as we learn about epidemiologic links between cases.
